PROFESSIONAL SUMMARY

Senior Angular Frontend Developer with 7+ years of experience building large-scale, bilingual (Arabic / English, RTL) web applications for government platforms and a US-based SaaS product. Specialized in Angular (v20+), TypeScript, RxJS and Signals, with full-stack experience in Node.js and MongoDB. Known for clean, scalable architecture, reusable component systems and fast, reliable delivery in remote teams.

KEY HIGHLIGHTS

- 7+ years with Angular, from v8 to v20+, across government, SaaS and client projects.
- 2,600+ commits, 500+ components and 1,200+ unit tests on a national Angular 20 platform with 20+ modules.
- Bilingual Arabic / English (RTL) specialist: 30,000+ translation keys delivered on one platform.
- Remote collaboration with a US-based product team since 2022; 100+ repositories on GitHub.

CORE SKILLS

Frontend: Angular (v8 to v20+), TypeScript, JavaScript (ES6+), RxJS, Signals, Standalone Components, Angular Material, HTML5, CSS3, SASS/LESS, Bootstrap

Backend & Data: Node.js, REST APIs, MongoDB, MySQL, SQL

Architecture: Reusable component libraries, Lazy Loading, Route Guards, HTTP Interceptors, Role-Based Access Control, Performance Optimization

Specialties: Internationalization & RTL (ngx-translate), Interactive Maps / GIS integration, PDF & print document generation, AI assistant integration

Tools: Git, GitHub, Bitbucket, Jira, Azure DevOps, TFS, Google Cloud

Languages: Arabic (Native), English (Professional working proficiency)

PROFESSIONAL EXPERIENCE

Senior Angular Frontend Developer Oct 2025 – Present
Arab International Commission for Reconstruction in Palestine (AIOCP) · Palestine

- Lead frontend developer of a national damage-assessment and reconstruction platform for the Gaza Strip, built with Angular 20: public, citizen and institution portals with 20+ business modules (projects, damage survey, aids & donations, beneficiaries, finances, fuel, GIS portal, reports).
- Authored 2,600+ commits in 13 months (about half of the project's 5,200+ commits) across a codebase of 500+ components and 95+ services.
- Built and maintain 1,200+ unit tests in 340+ spec files to keep releases stable.
- Delivered full Arabic / English (RTL) support with 30,000+ translation keys using ngx-translate.
- Integrated ArcGIS interactive maps and ApexCharts dashboards for location-based and analytics workflows.
- Built an in-app document studio that generates designed, multi-page A4 PDFs (Arabic / English) from project data, with live preview, auto-pagination and shareable links.
- Integrated an AI assistant that answers staff questions from live platform data, respecting each user's permissions; role-based access with route guards and interceptors.

Web Developer – MEAN Stack

Oct 2022 – Present

TopProz · California, USA (Remote) · topproz.com

- Develop features for a field service management SaaS for plumbing, HVAC and electrical companies (web app, iPad app and customer portal) using Angular, TypeScript and Angular Material.
- Built core business modules: email promotions, price book, invoices and estimates.
- Work in Jira sprints with a distributed US team; consume and extend Node.js / MongoDB REST APIs on Google Cloud.

Web Developer – MEAN Stack

Apr 2021 – Feb 2022

RealSoft Advanced Applications · Jordan

- Built the frontend of a national periodic statistical bulletins platform for Oman's National Centre for Statistics, with monthly and annual reports and admin / user roles.
- Developed "Adaa", a staff performance and work-management application (similar to Monday.com).
- Delivered multilingual Angular interfaces with Angular Material and SASS; managed sprints on TFS.

Freelance Angular Developer

2018 – 2021

Self-employed · Remote

- Delivered Angular projects for clients: tour booking platforms (Drbtours, Tripard), a trading-education platform (converted XD designs to Angular) and a multilingual ERP system.

Angular Developer (Internship)

Oct 2017 – May 2018

GGateway · Palestine

SELECTED PROJECTS

Motor Platform – Bilingual CMS & Admin Panel

Angular, TypeScript, Angular Material, ngx-translate, Node.js API | github.com/mostfaswaisi93/ng-motor

- Bilingual (Arabic / English, RTL) website with a full admin panel to manage home-page content, services, teams and site settings.
- Role-based access with auth and module guards, JWT via HTTP interceptor, rich-text editing and filterable data tables.

GitHub Portfolio

Angular, Node.js, Laravel, .NET, Vue | github.com/mostfaswaisi93

- 100+ repositories: 60 public (Angular apps, REST APIs, full-stack demos) and 40 private client and company projects.
- Private repositories are not shared publicly, in line with client and company confidentiality policies; details can be discussed in interview.

EDUCATION

Bachelor of Information and Communication Technology (ICT) · Al-Quds Open University — 2011 – 2016
